## AIM

---

To establish connection between server client using sockets.

## THEORY

---

### What is socket programming?

Socket programming is a way of connecting two nodes on a network to communicate with each other. One socket (node) listens on a particular port at an IP, while other socket reaches out to the other to form a connection. Server forms the listener socket while client reaches out to the server. They form the backbones of web browsing.[1]

Figure 2: Client-Server Interaction.

The exchange of information between client and server is summarized in the above diagram.

A server has a `bind()` method which binds it to a specific ip and port so that it can listen to incoming requests on that ip and port. A server has a `listen()` method which puts the server into listen mode. This

allows the server to listen to incoming connections. And last a server has an `accept()` and `close()` method. The `accept` method initiates a connection with the client and the `close` method closes the connection with the client.

## CODE

---

### Server:

```
import socket

s = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
s.bind((socket.gethostname(), 8000))
s.listen(5)

while True:
    clientsocket, address = s.accept()
    print(f'Connection established with {address}')
    clientsocket.send(bytes('Hello World!', 'utf-8'))
    clientsocket.close()
```

### Client:

```
import socket

s = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
s.connect((socket.gethostname(), 8000))

msg = s.recv(1024)
print(msg.decode('utf-8'))
```

## OUTPUT

---

### Server:

 Command Prompt - python server.py

```
Microsoft Windows [Version 10.0.18362.1139]
(c) 2019 Microsoft Corporation. All rights reserved.

C:\Users\priyavmehta>python server.py
python: can't open file 'server.py': [Errno 2] No such file or directory

C:\Users\priyavmehta>cd Desktop

C:\Users\priyavmehta\Desktop>python server.py
Connection established with ('192.168.43.209', 49231)
Connection established with ('192.168.43.209', 49232)
Connection established with ('192.168.43.209', 49235)
Connection established with ('192.168.43.209', 49236)
Connection established with ('192.168.43.209', 49237)
```

### Client:

 Command Prompt

```
Microsoft Windows [Version 10.0.18362.1139]
(c) 2019 Microsoft Corporation. All rights reserved.

C:\Users\priyavmehta>cd Desktop

C:\Users\priyavmehta\Desktop>python client.py
Hello World! LAPTOP-UCIKGGOD

C:\Users\priyavmehta\Desktop>python client.py
Hello World! LAPTOP-UCIKGGOD

C:\Users\priyavmehta\Desktop>python client.py
Hello World! LAPTOP-UCIKGGOD

C:\Users\priyavmehta\Desktop>python client.py
Hello World! LAPTOP-UCIKGGOD

C:\Users\priyavmehta\Desktop>python client.py
Hello World! LAPTOP-UCIKGGOD

C:\Users\priyavmehta\Desktop>_
```

## CONCLUSION

---

I understood the basics of socket programming and established a simple connection between client and server using the same.
